PickPoint® Will Call System is the industry's first and best LED light-guided will call system

PickPoint® Will Call System fits any size pharmacy, resulting in increased accuracy and efficiency, improved inventory management, reduced return-to-stock, and a cleaner appearance. It is easy to integrate and works with most popular pharmacy management and workflow systems. And it is so easy for your pharmacy staff to use.

Central Fill Workflow and Toting Methods

Real-time visibility throughout the entire organization—see the status of every Rx instantly. Work the way you and your operation prefer with a number of options for:

- Automated Outbound Communications
- Loading and Shipping Totes
- Receiving and Checking In Totes
- Full Reverse Logistics Available
- Easy integration

PickPoint® Lobby Management System for Out-Patient Pharmacy

Take your pharmacy lobby to the next level with PickPoint® Lobby Management System. It's the ideal solution for today's busy hospitals and healthcare systems.

- Integrates seamlessly with the PickPoint® Will Call System
- Improve patient flow for will call pick up
- Maximize your space and improve workflow
- Increase medical adherence and improve medical outcomes

PickPoint® Remote Dispensing System enables remote and after hours dispensing

Extend telepharmacy point-of-care and take the power of your pharmacy team further with the PickPoint® Remote Dispensing System. PickPoint® makes it easy for you to add remote dispensing to your clinics and points-of-care facilities. Streamline operations, reduce costs, improve outcomes, and ensure compliance.

The PickPoint® External Will Call Locker—Extend Will Call or Provide After-Hours Dispensing

- Functions as an automated will call solution that is located outside the pharmacy.
- Allows for storing various dosage forms and package sizes, including bulk items and other large containers.
- Fully integrates with PickPoint®'s Will Call System. Single platform for locker control, reports, users, etc.

- Seamlessly works to extend central fill and mail order operations to optimal pick-up locations
- Configurable arrangement - select from a variety of available compartment sizes.

The PickPoint® Automated Patient Communication Solution

PickPoint®'s Patient-Direct Communications System streamlines pharmacy workflow through a wide variety of messaging platforms. Our proprietary software solution provides real-time, customizable messaging that is easy to set up and even easier to use. Select patient communications based on patient preferences—select text, voice message, or E-mail. But that's not all—PickPoint®'s Patient-Direct Communications System works to improve medication adherence and reduces return-to-stock rates.

- Keep your patients up-to-date:
 - Automatically send alerts when auto-fill prescriptions are ready
 - Automatically notify patient prescriptions are ready when loaded into Will Call
 - Pick Up and Return-to-Stock Reminders
 - Automatically send additional notifications when necessary
 - Refill Exceptions
 - Custom Messaging Options
 - Multiple Language Options
 - And many more

Improvements in 4 key areas:

1. Pharmacy/Clinic Operations
2. Financial Improvement
3. Compliance Made Easy
4. Information Technology

"We were looking for a cost effective way to improve our will call process and the Pickpoint WCS solved most of the issues we were dealing with...Now Return-to-stock is just a walk in the park. Bottom line, the system created value for our patients and pharmacy staff."

Eric Djassa, Chief Pharmacist
Winslow Indian Health Care Center
